About Iridium Technology

Iridium Technology is a global firm focused on business intelligence, profitability, financial management, and timekeeping for legal and professional services firms. Iridium has more than 300 law firm clients globally, ranging from 40 to 2000+ timekeepers. Iridium's mission is to help firms improve processes and maximize profitability.

Iridium has the broadest footprint of business intelligence and financial analytics products for the legal industry. It's four product families – Iridium BI, Intellistat, Steere, and SmartTime – include timekeeping, operational utilities, business intelligence, and financial analytics software.
