

Queues Powers Workflows

nQzw™ Queues is the workflow engine that drives the business and practice of law. Queues integrates with the organization's core technology systems, automating processes and delivering key information to attorneys and staff when they need it, wherever they are.

Workflows that Work From Anywhere

nQzw Queues enables a hybrid approach, allowing for work inside and outside the office, powering Scanning & Printing, Practice Management and Cost Recovery & Analytics solutions.

Work From Anywhere requires legal professionals to work as effectively in the office as they do working from anywhere, and that means full access to all documents, powered by effective and simple-to-use scanning and printing workflows.

Leverage your investment in your practice management system to improve your firms's realization and cash flow and deliver the client/matter financial information your legal professionals need to make informed decisions quickly and effectively from wherever they are.

Effective cost recovery that supports Work From Anywhere provides you with a full financial picture of costs, delivering both the opportunity to bill them to your client as well as full understanding of expenses for a competitive edge when it comes to profitability.
