

Practical Law® Canada and BroadGrain

KJ's position requires her to be up to speed on a broad range of legal areas. She turns to Practical Law® Canada as a reliable starting point on all of it.

Practical Law Equips KJ to Tackle Unique Challenges

KJ (Ke-Jia) was still relatively new to her position as in-house counsel at BroadGrain when she realized just how widely her practice would stretch — and how critical a tool Practical Law would become. Her position requires her to be current on every conceivable area of law.

“Knowledge of the varied number of areas that are relevant to a general in-house practice are an essential part of my legal responsibilities,” KJ explains. “Practical Law’s precedent documents have become an essential starting point for my drafts of policies and corporate documents.”

KJ says that regardless of the area of law she’s asked about, Practical Law is her go-to tool for not just getting started, but for doing her best work.

“I’ve been able to understand and identify areas for compliance and create policies to address these gaps, in particular around employment law. I’ve also developed confidentiality agreements as templates to help save time.”

Her Favourite Features are a Huge Timesaver

For KJ, it means a lot that the answers she needs are just a single, quick search away.

“The simple search functionality allows me to find a wide breadth of topics, from employment to guarantees, and confidentiality agreements to financing and compliance including competition and anti corruption.”

KJ also values how easy it is to navigate from Practical Law to Westlaw® and Practice Notes. In a practice that requires her to be knowledgeable on a wide variety of areas, Practice Notes consistently gets her up to speed on every issue.

“The seamless integration with Westlaw means if I need to examine a referenced case in the Practice Notes guides, I can do so with just a click,” KJ explains. “Practice Notes provides an efficient primer on the areas of law for which I could use a refresher.”

No wonder KJ says she’d recommend Practical Law Canada to any lawyer — whether solo, at a larger firm, or in-house.

“Practical Law has been my go-to source for legal information. It helps me exceed the expectations of my employer to be able to address many areas of law in a timely and cost-effective manner,” Lisa says. “I highly recommend it for any legal departments, especially for the high demands placed on solo in-house counsel.”
